

Growing evidence suggests that the generation edging toward retirement may be in worse health **than their parents.**

Although less likely to smoke, they are more likely to report less stamina, difficulty climbing stairs, and getting up from a chair.

They experience more chronic problems such as high cholesterol, blood pressure, and diabetes.¹

One-dimensional approaches to health and fitness

such as working out at the gym, running or strenuous games like tennis, can lead to physical injury and do not address the social or psychological dimensions related to health. **The ideal prescription** for improving or maintaining health is to find an activity that combines all three dimensions—*physical, mental and social.*

The multi-dimensional approach to healthy living is called **Square and Round* dancing** and incorporates the three holistic dimensions – **Physical, Psychological and Social.**

These two dance forms are all around **COMPLETE EXERCISES and fun too!**

Discover the many benefits!

* Round Dancing is the choreographed ballroom companion to Square Dancing.

**“We do not grow too old to dance.
We grow old because
we do NOT dance.”**

Herb Greggerson, square dance caller, 1953

Discover the many benefits of Square and Round dancing

Physical Benefits Low impact exercise

- ✓ Increase lung capacity
- ✓ Improve muscle tone
- ✓ Maintain joint flexibility
- ✓ Improve bone density
- ✓ Improve balance and coordination
- ✓ Develop new motor skills
- ✓ Increase blood flow through relaxed body rhythm

“ [Square dancing] ... is an activity that addresses most of the conditions of poor physical health while minimizing the obstacles presented by many other types of physical activity.” Chris Collins M.Sc.²

“ Dance is a weight-bearing activity, which builds bones.”
Catherine Cram, MS, exercise physiologist³

“ Any weight-bearing exercise, including square dancing, is a major benefit as one ages.” Dr. Lewis Maharam, New York City sports medicine specialist⁴

Psychological (Mental) Benefits Lower stress

- ✓ Develop mental agility
translating oral commands into action
- ✓ Reduce age-related memory loss
remembering calls and cues
- ✓ Focus on dancing reduces outside worries
leave your problems at the door!
- ✓ Reduce depression and loneliness
dancing is a group activity
- ✓ Meet a challenge and achieve success
learning becomes fun

“... square dancing [is one of] the few activities shown to involve both physical activity and mental stimulation significant enough to reduce the risk of dementia — a true two-for-one example of using it or losing it.”
Dr. Mehmet C. Oz⁵

“ Dancing reduces dementia risk by 76% Board games by 73% - Playing a musical instrument by 69% - Working crosswords by 38%.” The Washington Post⁶

Social Benefits Connect with others

- ✓ Make new friends and expand social contacts
- ✓ Reduce inhibitions
- ✓ Develop new social groups
- ✓ Create social ties and business contacts
- ✓ Find opportunities to get involved and make a difference
- ✓ Have fun

“ Square dancing contributes to a more healthy and independent lifestyle.”
Dr. Lewis Maharam,
New York City sports medicine specialist⁷

“ Laughter may help prevent heart attacks.”
Dr. Michael Miller, Centre for Preventive Cardiology,
University of Maryland⁸

“ Maintaining social connections has an important effect on quality of life.”
Laura Mosqueda, MD, Geriatrics and Family Medicine
Center, University of California, Irvine.⁹
